SUPPLEMENTARY AMENDMENT UNDER 37 CFR 1.111

Sir:

Please amend this application as follows:

In the claims:

Please amend claim 8 as follows:

Sub #1

8. (Amended Six Times)   In a PC/TV computer system having keyboard for providing alphanumeric characters to said PC/TV computer and also having a display monitor, a method of selecting a network station comprising the steps of:

storing by predetermined network station and internet site names;

placing said PC/TV computer in one of a user selectable TV mode and a Computer mode;

pressing a first alphanumeric key on said keyboard;

creating a monitor display of the or each stored network station name or internet site name containing a first character matching the character associated with said first alphanumeric key;

effecting user input to the system to mark the or a user selected displayed name; and

then effecting user input to the system to establish communication between the PC/TV computer system and a network station corresponding to the displayed network station name or internet site marked by said user input.
